

INTERNATIONAL INSTITUTE OF HEALTH MANAGEMENT RESEARCH

Summer Training Brochure Session 2011-13

The global changing scenario in the last few decades, characterized by burgeoning population, unprecedented socio-economic transformation, quantum leaps in technology and radical political shifts have resulted in a dynamically changing demand-supply pattern for all services, more so for the health sector. This has thrown up a need for a variety of healthcare professionals.

The International Institute of Health Management Research, New Delhi Summer Training Brochure for 2011-2013 with details of our students is in your hands who are studying Post Graduate Diploma in Hospital and Health Management (PGDHHM). It gives us immense pleasure to invite you to participate in the summer training process of the fourth batch of 118 graduate students. The batch has been selected through a rigorous selection process including interviews and group discussions.

IIHMR, Delhi is a member of IIHMR Society and has drawn on the intellectual capital and learning of the last three decades of the pioneering IIHMR, Jaipur founders. The Institute has since been training these graduate students in the knowledge, skills and attitudes required for the modern, ever-changing health industry, through its 2-year Post Graduate Program in Hospital and Health Management.

The vision of IIHMR, New Delhi is to contribute substantially to the enhancement of health and hospital management education, through a well conceived holistic education planning. Through dedicated efforts of the faculty and students, the Institute attempts to translate this vision into action. A vibrant link with the health industry, government and business houses helps students to capture the dynamism of the real world.

The most important aspect of education at IIHMR is the industry-centric approach of the program. Towards that end, the Summer Internship is a very important and integral part of the pedagogy. During summer project, the participants work on a focused project embedded in the organisation, where the nodal person also mentors them along with our faculty members. The summer project reports could be valuable inputs to the organisation as well as enhance the student's understanding of the industry.

We are happy to present the profiles of our students to all the potential employers. Our endeavor is to reach out to several organizations and institutions in search of suitable placement for our students – public & private healthcare providers, government programme managers, consultancies, IT companies and development organizations. We look forward to welcoming you at the Institute to interact with us and the students.

With best regards
Prof (Dr.) Rajesh Bhalla
Dean, Academic and Students Affairs

SUMMER TRAINING PROCESS

The duration of summer training is of two months. The summary of student profiles is provided in the succeeding pages to assist the Organisations to match job profiles.

The Graduate Students are not permitted to enter into any direct communication with the organization, which the Institute has already contacted. The organisations are therefore requested not to contact any students directly but to route all correspondence through the Placement Cell.

Interested Organization may kindly contact:
